

## СХЕМА РАСПОЛОЖЕНИЯ ЭЛЕМЕНТОВ

## СОДЕРЖАНИЕ

### 1. ОБРАМЛЕНИЕ ОКОН:

- НАЛИЧНИКИ
- ПИЛЯСТРЫ
- ПОДОКОННИКИ
- ЗАМКОВЫЕ КАМНИ

### 2. КАРНИЗЫ

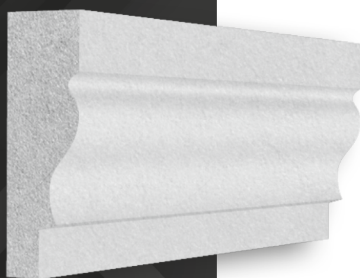

### 3. РУСТОВЫЕ КАМНИ

### 4. КОЛОННЫ

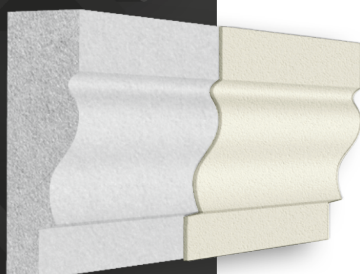

### 5. МОНТАЖ

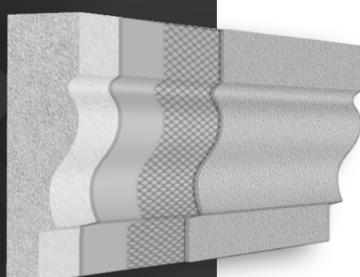

## СОСТАВ ДЕКОРАТИВНЫХ ИЗДЕЛИЙ

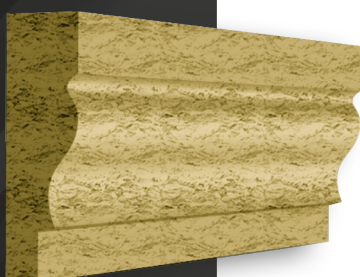

Декоративный  
элемент на основе  
пенопласта без  
покрытия

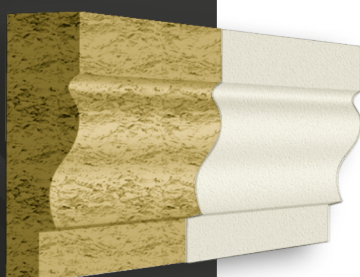

Декоративный элемент  
на основе пенопласта с  
эластичным покрытием

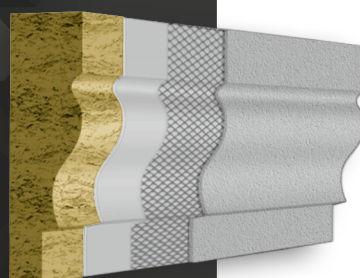

Декоративный элемент на  
основе пенопласта с  
полимерцементным  
покрытием,  
армированным  
стеклосеткой

Декоративный  
элемент на основе  
минеральной ваты  
без покрытия

Декоративный элемент на  
основе минеральной ваты  
с эластичным покрытием

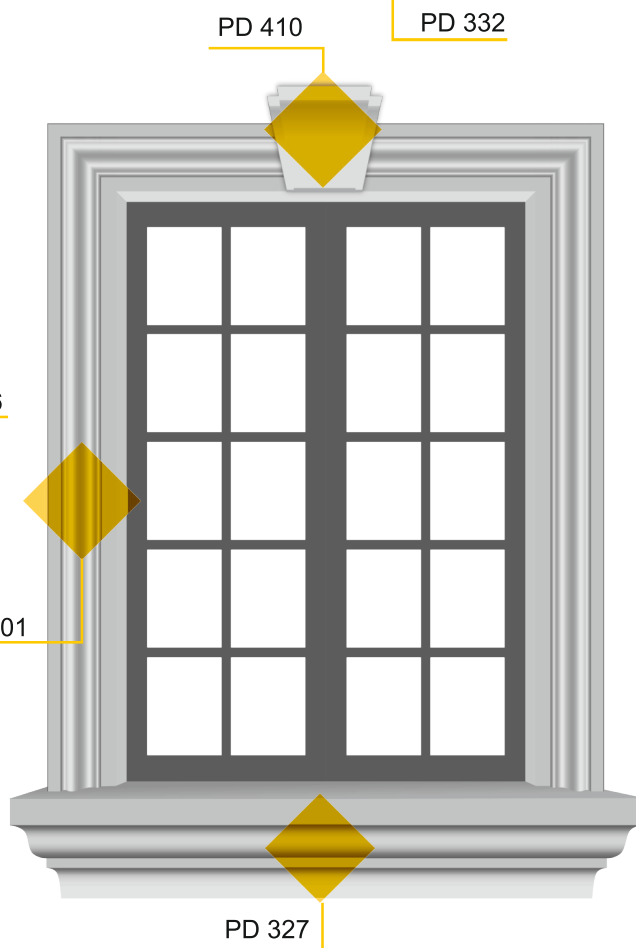

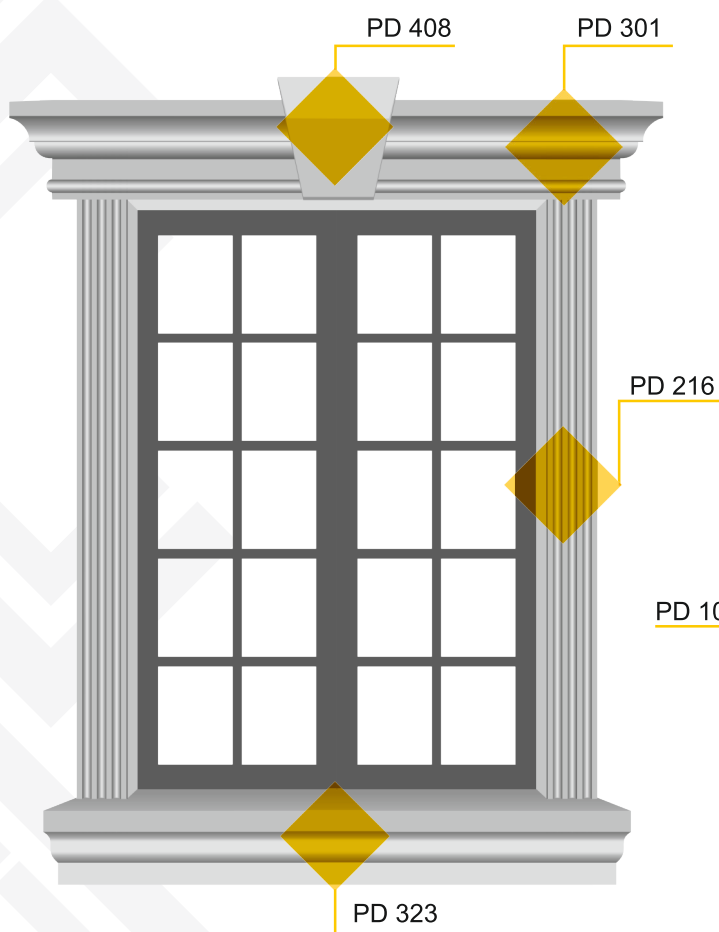

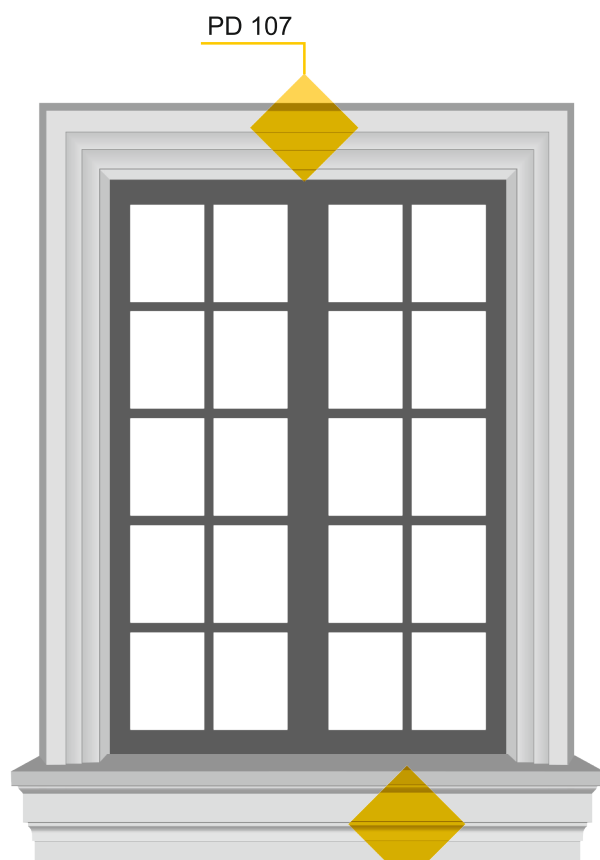

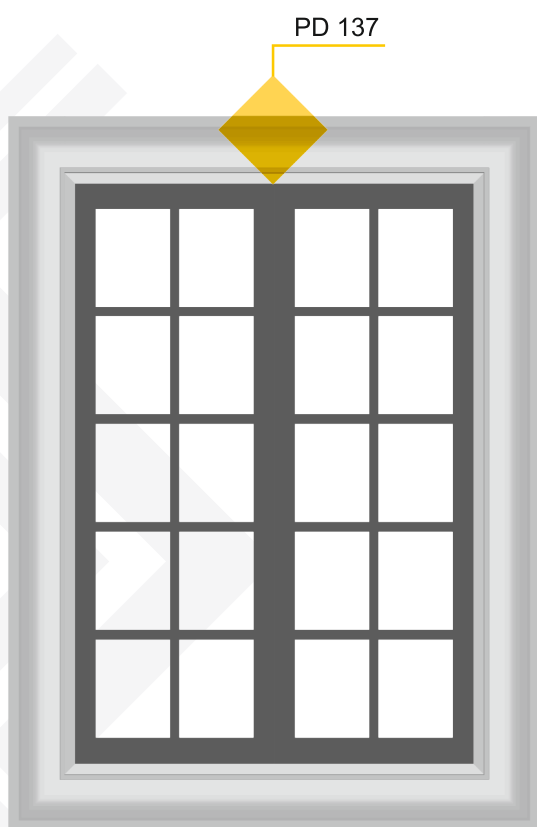

Декоративный элемент на  
основе минеральной ваты  
с полимерцементным  
покрытием,  
армированным  
стеклосеткой

\*Штучные изделия. Диаметр и профиль может меняться по желанию.

# МОНТАЖ

## 1. ПОДГОТОВКА ОСНОВАНИЯ И РАЗМЕТКА

Рекомендуем монтировать декор до нанесения декоративной штукатурки. Поверхность должна быть чистая, ровная, без трещин, загрунтованная. Рекомендуем предварительно нанести разметку декора на фасад.

## 2. ПОДГОТОВКА ИЗДЕЛИЙ К ПРИКЛЕИВАНИЮ

Переносить элементы декора необходимо двумя руками, повернув элемент на ребро. Распиловка, торцовка изделий производится электрической торцовочной пилой или ножовкой с мелким зубом.

## 3. ПРИКЛЕИВАНИЕ ДЕКОРА

Приклеивать фасадный декор рекомендуем:

3.1. На полиуретановую клей-пену.

3.2. На фасадный клей для приклеивания соответствующего утеплителя на цементной основе.

В случае, если элементы имеют сечение от 200x150 мм и более, рекомендуем анкеровку с шагом 1м. Для этого делается потай в изделии.

## 4. СТЫКИ

Рекомендуем следующие варианты стыковки:

1 вариант: Стык заполняется эластичным клеем-герметиком на полиуретановой основе под окраску. Шов не должен превышать 3 мм

2 вариант: Края элементов не дотягиваются защитным слоем. Заготовки склеиваются клей-пенной. На место стыка приклеивается дополнительный слой сетки. Поверх сетки наносится армирующий состав.

## 5. ПОКРАСКА

Перед покраской поверхность декора зачищается и грунтуется. Краска должна быть эластичная. Покраска производится минимум в 2 слоя.
